insight[®] Apex

Insight[®] Apex is the ultimate software solution for customers that need to provide and manage access to multiple image collections. *Insight*[®] Apex includes Luna professional services to build a custom data design (using institution-specific metadata fields), integration of the first 5,000 images into the system, and on-site installation & training. Bundled with the Apex package are software tools for adding and cataloging an unlimited number of additional images and collections, local management of user accounts and privileges through *Insight*[®] Administrator Tools, distributable media servers, and the ability to share collections with other *Insight*[®] clients.
