

## Insight + LUNA Product and Services – Overview

---

LUNA's renowned elegant user interface coupled with Insight's powerful collection building tools makes the Insight + LUNA software suite the best software available for building, managing, and sharing digital image collections.

### Insight + LUNA Architecture

*Conveniently available as a Hosted Service or as a Site License, the Insight + LUNA architecture is designed to support distributed collection building while administrative functions are centrally controlled.*

#### Server Components – centrally managed

- User Manager
- Collection Manager
- Media Manager
- Insight Administrator Tools
- LUNA Server
- LUNA Publisher

#### Collection Building Tools – for distribution

- Insight Studio
- Inscribe Data Editor

### Includes

#### LUNA Collection Portal

Consolidated access to all available public LUNA collections from LUNACommons.org.

#### BookReader Integration

- Compile BookReader objects with your own source material.
- Add Internet Archive and/or Open Library titles to collections.

#### Image Management

Derivative image processing with a JPEG2000 processor.

### Featuring

#### Share and Receive with LUNACommons.org

We've built a new public web resource called the LUNA Commons ([www.lunacommons.org](http://www.lunacommons.org)) so you can easily gain access to FREE content and promote your own.

Because collections in Insight + LUNA can be built for public, private, or shared access, your collections are fully optimized for web search engines and distribution-ready for the new LUNA Commons, thereby providing access to thousand of end users who may not otherwise know about them.

Don't feel like sharing? That's fine, you can still choose to receive public collections to your own LUNA site without sharing yours. This way, both your collections and the free collections from LUNA Commons can be centrally accessed by your user community.

### User Benefits

*Learn, create, share, explore and much more!*

#### Search and Discovery

LUNA includes category viewing – Who, What, When, Where – faceted search results, simple and advanced search options, and full text search.

#### Viewing Tools

Seamlessly browse images, audio, video, PDF, and BookReader media. Continuously zoom on high-resolution images and book pages.

#### Organize and Manage

Media Groups allow users to easily organize their saved searches and select content.

#### Personalized Content

Add media through My Uploads and Flickr integration.

#### Web 2.0 Tools

Linking and embedding tools allow users to easily and creatively integrate select content with social media, courseware, etc.

#### Create

Build dynamic presentations and slide shows, export to PowerPoint, add annotations and more.

### Admin Benefits

*A collection published to LUNA automatically becomes a website with:*

- End-user account creation
- Integration with Active Directory LDAP and Open LDAP
- Optional integration with Google ads
- Built-in search engine optimization
- OAI-PMH
- Built-in Google site map
- Built-in Google analytics
- Support for eCommerce integration
